

Distribution and Product Ordering Guide

Information to Help You With Ordering and Receiving PAPZIMEOS

This resource is provided for informational purposes only. It is always the healthcare provider's (HCP) responsibility to determine details specific to individual patients and to submit factual and accurate claims for the products and services rendered. HCPs should contact third-party insurers for specific information on their coding, coverage, payment policies, and fee schedules. Precigen makes no guarantee regarding reimbursement for any service or item. **This resource is not intended as reimbursement advice, legal advice, medical advice, or a substitute for an HCP's independent professional judgment.**

Ordering PAPZIMEOS

Create an Account

Orders of PAPZIMEOS are placed through the third-party distributor, Cencora. To begin an order, you will need to create an account with Cencora. You can do this by sending an email to AdvancedTherapies@amerisourcebergen.com with the following information:

- ☐ Name of your shipping destination
- ☐ Address you would like to ship to
- ☐ A point of contact (who can complete the account setup documents and provide licensure, if needed)

If you have already created a Cencora account, send an email with your account information, so they may ensure your account is ready for order processing.

Place an Order

You may place an order by phone, email, or directly through Cencora's online ordering portal, ABC Order. To process your order, you will need to provide the following information:

- ☐ Account number
- ☐ PAPZIMEOS vial order quantity
- ☐ PO number
- ☐ Confirmation of the availability of an ultra cold $\leq -60^{\circ}\text{C}$ ($\leq -76^{\circ}\text{F}$) freezer storage
- ☐ Verification of insurer approval
- ☐ Insurer name
- ☐ Confirmed treatment date
- ☐ Prescribing physician
- ☐ Treatment date
- ☐ Dose number
- ☐ Requested delivery date
- ☐ Requested delivery time
- ☐ Specialty delivery instructions (optional)
- ☐ Primary delivery contact name, email, and phone
- ☐ Secondary delivery contact name, email, and phone
- ☐ Third delivery contact name, email, and phone (optional)

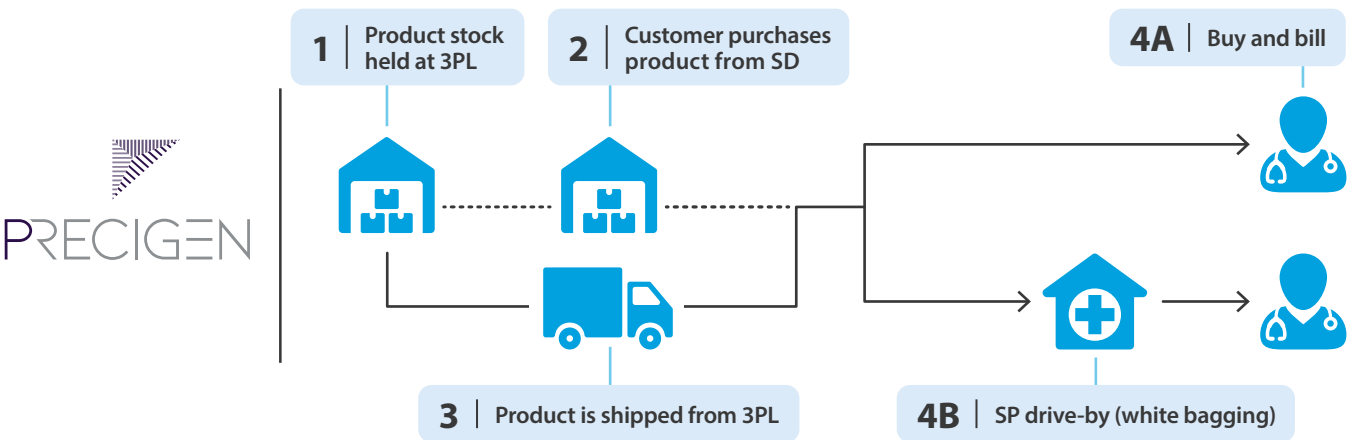

Order Deadlines

Orders should be placed at least 2 weeks prior to the planned administration. Specialty pharmacy orders and first-time buy-and-bill orders should expect an additional delivery day. Please keep in mind the following timelines for order placement and delivery:

- Orders are expected to be delivered within 2 to 3 business days from the time of order based on the location of your facility
- Deliveries will be scheduled Tuesday through Friday with Advanced Shipping Notifications being provided

PAPZIMEOS Fulfillment Process

3PL=third-party logistics; SD=specialty distributor; SP=specialty pharmacy.

Buy-and-Bill Fulfillment Process

Providers will manage prescription fulfillment and delivery through their selected pharmacy. Providers can reach out to Cencora or the specialized carrier directly with any order inquiries.

Specialty Pharmacy Fulfillment Process

Precigen's exclusive specialty pharmacy will place the prescription order with Cencora on the provider's behalf and coordinate with the specialized carrier for delivery to the site of care. Providers can reach out to the specialty pharmacy with any order inquiries by calling (866) 827-8180.

Orders of PAPZIMEOS are fulfilled once a prescription is approved by the insurer. Upon approval, both the provider and the patient will receive an explanation of benefits (EOB) from the specialty pharmacy.

Receiving PAPZIMEOS Shipments

Shipping Process

Orders of PAPZIMEOS are delivered to either the site of care or a specialty pharmacy, depending on the fulfillment process selected by the provider. Multiple vials of PAPZIMEOS can be shipped together in the same shipping box, up to a maximum of 4 vials, each in an individual carton. Orders over this amount are delivered in additional shipping boxes as appropriate.

The PAPZIMEOS carton is shipped frozen at $\leq -60^{\circ}\text{C}$ ($\leq -76^{\circ}\text{F}$) in an insulated shipping box containing dry ice and should be stored in an appropriate freezer at $\leq -60^{\circ}\text{C}$ ($\leq -76^{\circ}\text{F}$) until ready to thaw and administer.¹

Temperature Monitoring

To ensure that the product remains in an acceptable temperature storage range, the shipping box will contain 2 monitors—the Tive Solo 5G monitor and the Sensitech TempTale Ultra DI monitor. The temperature monitoring devices track and record the temperature throughout the entire shipment, and the associated data is available upon delivery.

Delivery Inspection Checklist

An inspection of contents should be performed before accepting the delivery. In the shipping box, you should find an inner Styrofoam box that contains:

- ☐ Plastic bag containing PAPZIMEOS carton(s)
- ☐ Tive Solo 5G monitor
- ☐ Sensitech TempTale Ultra DI monitor
- ☐ Dry ice

Make sure to have on hand the following before opening the shipping box:

- ☐ Box cutter
- ☐ Protective gloves
- ☐ Scoop and bucket for dry ice
- ☐ Personnel trained for handling dry ice with appropriate personal protective equipment to avoid injury

 TempTale mobile app

Temperature Verification Process

- The PAPZIMEOS carton is shipped frozen at $\leq -60^{\circ}\text{C}$ ($\leq -76^{\circ}\text{F}$) in an insulated shipping box containing dry ice¹
- The Sensitech TempTale Ultra DI monitor is located with the Tive monitor on the top of the Styrofoam lid under the shipping box carton lid. The TempTale display will indicate if the product stayed within the acceptable temperature range or if there is an alarm to be investigated
- The Tive Solo 5G monitor is a back-up device and its data is available through their web-based dashboard or mobile app
- The specialized carrier can provide the temperature data reports for the Tive Solo 5G and Sensitech TempTale Ultra DI monitors if needed
- Once the temperature of the PAPZIMEOS shipment has been verified, the specialized carrier will request a signature for the received product. The specialized carrier is responsible for returning the Sensitech TempTale Ultra DI monitor and the Tive Solo 5G monitor, as well as any product that did not pass temperature verification and could not be received

Unpacking Instructions

- Verify all shipping paperwork
- Open the shipping box carton from the top
- Press and hold the STOP button on the Sensitech TempTale DI monitor for 1 to 3 seconds until the STOP icon appears in the upper right-hand corner of the screen. Note that the Tive Solo 5G does not have a STOP button
- After review of the Sensitech TempTale DI monitor, remove both monitoring devices from the top of the Styrofoam lid and place the monitors on top of the closest corner of the shipping box
- Wearing protective gloves and eyewear, use a scoop and a bucket to gently remove some of the dry ice from the shipping box until the plastic bag is visible containing the product. Pay extra attention to not damage the packaging, the Sensitech TempTale DI monitor, or the Tive Solo 5G monitor
- Remove product packaging and gently return the previously extracted dry ice back to the shipping box
- **Immediately transfer the cartons of PAPZIMEOS to ultra cold freezer storage**
- Close the Styrofoam box, placing the Styrofoam lid on top of the Styrofoam base
- Dispose of the shipping box and dry ice according to the established protocol*

*Avoid skin contact with dry ice. To dispose of dry ice, place the shipping box in a well-ventilated area at room temperature until the ice sublimates away. Do not leave dry ice in an unsecured area. Never dispose of dry ice in a trash can. Do not dispose of dry ice in the sink, toilet, or other drain fixtures.

Storing PAPZIMEOS

Site Storage Requirements

 PAPZIMEOS is provided as a single-dose vial of sterile frozen suspension. On receipt, the PAPZIMEOS carton should be stored in an ultra-cold freezer at $\leq -60^{\circ}\text{C}$ ($\leq -76^{\circ}\text{F}$) until ready to thaw and administer.

PAPZIMEOS MUST BE RAPIDLY thawed before use and prepared for immediate administration.

Once thawed, DO NOT place the PAPZIMEOS vial in a refrigerator, freezer, or on dry ice. Protect PAPZIMEOS from light. DO NOT shake the vial.¹

After thawing, DO NOT hold PAPZIMEOS at room temperature for more than 60 minutes.¹

Follow universal biohazard precautions for handling and for the disposal of all vials and syringes.¹

If the product arrives damaged, contact Precigen by calling (855) 743-6777 and in writing via email at medinfo@precigen.com promptly following discovery.

Unopened units of PAPZIMEOS may be returned according to the Precigen Returned Goods Policy. If the product is deemed unusable, as outlined in the Returned Goods Policy, contact Precigen at PrecigenReturns@icsconnect.com and call (844) 263-5647 to initiate the return process.

Safe Handling

 Treat any PAPZIMEOS spills with a virucidal agent (such as sodium hypochlorite with 0.5% active chlorine or 6% hydrogen peroxide) for 15 minutes. Dispose of any unused product or waste materials in accordance with the facility biohazard waste disposal procedure.¹

Follow universal biohazard precautions for handling and for the disposal of all vials and syringes.¹
